

High Level Tasks (User Stories)

Implementation Semantics

Club accounts

1. User logs in via an email / google account
2. 1-time: create a club (one club per account)
 - a. Make the club if it doesn't already exist
 - i. Parameters: Club Name, Type (sports, board games, art, etc.)
 - ii. On successful creation, redirect the club account to their page, and prompt them to enter their club description and image (a banner/logo, optional)
 - iii. Allow anyone to make a club? OR should there be a vetting process?
3. Make a post
 - a. Parameters: Title, Description, Author, Image (optional)
 - b. Author should be the Club Name of the account making the post
 - i. User would not need to input this (done automatically on the backend)
 - c. If a user is not logged in, Make a Post should prompt them to log in
 - i. If they are logged in as a Club Account, allow them to post
 - ii. If they log in but aren't a Club Account ???
 1. Prompt them to make a club?
 2. OR that's restricted?

Club Pages

What does a user see on a club page? What does a club owner see on their club page?

1. If a user goes to a club's page, the user should see:
 - a. All the posts that the club has made
 - b. Follow button
 - c. Club contact info
2. If the club account navigates to their own page they should see 2 buttons on each post
 - a. Edit
 - b. Delete
3. If the club account navigates to their My Profile page, there should be an option for them to
 - a. Edit the header of their page (description, image, title)

- b. Delete their club (deletes their club account from the database and all posts they've made)

Posts

1. Parameters: Title, Description, Author, Image (optional)
 - a. Admin accounts
 - i. For moderation: admins can choose to hide a post if deemed necessary (e.g. clear violation, several reports). Post maker can then open a ticket to resolve the issue e.g. edit the post so it is safe or delete the post
 - ii. Admins can see a button with ^^ functionality on any post on any route (following, what's new, the club page)
 - b. Hyperlink to the club page (Author)

Pages

ALL

1. Search for a post keyword

Following

1. Each user has an entry in the database that has a list of clubs they follow
2. Render posts from each club onto their Following page

What's New

1. Same as following, except renders all the most recent posts from all clubs

Discover

1. Search bar for the club accounts
 - a. Each text line is a hyperlink to the club page
